NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(1) Basis of Presentation

The unaudited condensed consolidated financial statements included herein have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. It is suggested that these unaudited condensed consolidated financial statements be read in conjunction with the financial statements and notes thereto included in the Company's 2016 annual report on Form 10-K. In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments, consisting of only a normal and recurring nature, necessary to present fairly the financial position of the Company as of March 31, 2017, and the results of operations and cash flows for the interim periods presented.

(2) Adoption of New Accounting Standards

In May 2014 the Financial Accounting Standards Board (FASB) issued the Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, that will supersede nearly all existing revenue recognition guidance under US GAAP. The core principle of the guidance is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The standard was originally to be effective for public entities for annual and interim periods beginning after December 15, 2016. On July 9, 2015 the FASB decided to defer by one year the effective dates of the new standard for both public and nonpublic entities reporting under US GAAP. Early adoption would be permitted for all entities, but not before the original public entity effective date (i.e. annual and interim periods beginning after December 16, 2016).

Entities can choose to apply the standard using either the full retrospective approach or a modified retrospective approach. Entities electing the full retrospective adoption will apply the standard to each period presented in the financial statements. This means that entities will have to apply the new guidance as if it had been in effect since the inception of all its contracts with customers presented in the financial statements. Entities that elect the modified retrospective approach will apply the guidance retrospectively only to the most current period presented in the financial statements. This means that entities will have to recognize the cumulative effect of initially applying the new standard as an adjustment to the opening balance of retained earnings at the date of initial application. The new revenue standard will be applied to contracts that are in progress at the date of initial application.

The Company will adopt ASU 2014-09 in the first quarter of 2018 and apply the modified retrospective approach. The Company has continued to monitor FASB activity related to the new standard and is currently assessing existing contracts with customers as a part of determining the potential effect the new standard will have on its consolidated financial statements. The Company currently anticipates that the adoption of ASU No. 2014-09 could impact the accounting treatment of certain contracts, as well as pre-production engineering, development and tooling costs related to products manufactured for our customers under long-term supply agreements.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which provides guidance for lease accounting. The new guidance contained in the ASU stipulates that lessees will need to recognize a right-of-use asset and a lease liability for substantially all leases (other than leases that meet the definition of a short-term lease). The liability will be equal to the present value of lease payments. Treatment in the consolidated statements of earnings will be similar to the current treatment of operating and capital leases. The new guidance is effective on a modified retrospective basis for the Company in the first quarter of its fiscal year ending December 31, 2019. The Company is currently in the process of evaluating the impact of adoption

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(2) Adoption of New Accounting Standards (continued)

of this standard on its consolidated financial statements. Upon adoption, the Company does not anticipate a material impact on the Company's Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which amends Accounting Standards Codification ("ASC") Topic 718, Compensation - Stock Compensation. ASU 2016-09 simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Under previous guidance, excess tax benefits and deficiencies from stock-based compensation arrangements were recorded in equity when the awards vested or were settled. ASU 2016-09 requires prospective recognition of excess tax benefits and deficiencies in the income statement as a component of the income tax provision. In addition, under ASU 2016-09, excess income tax benefits from stock-based compensation arrangements are classified as cash flow from operations, rather than as cash flow from financing activities. ASU 2016-09 also allows for the Company to make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest or account for forfeitures when they occur. The Company will continue to apply its existing entity-wide policy to estimate the number of awards expected to be forfeited.

Impact to Consolidated Statements of Income

One of the more significant impacts of adopting ASU 2016-09 is the required change in how the Company recognizes the excess tax benefits or deficiencies related to share-based compensation. For example, prior to adopting ASU 2016-09 such benefits and deficiencies were credited or charged, respectively, to additional paid-in capital in the Company's Consolidated Balance Sheets. Under ASU 2016-09, these benefits and deficiencies are recognized as a discrete tax benefit or discrete tax expense, in the Company's Consolidated Statements of Income. For the three months ended March 31, 2017, the Company recognized a discrete tax benefit of \$1.8 million related to net tax benefits from share-based compensation. ASU 2016-09 requires companies to adopt the amendment related to accounting for benefits and deficiencies on a prospective basis only. As a result, no change has been made to the Consolidated Statements of Income for the three months ended March 31, 2016 related to the \$0.4 million of net tax expense the Company recognized as additional paid-in capital during such three months. Net tax expense of \$0.4 million net of \$0.5 million tax expense. In consideration of the impact of the adoption of this standard to earnings per share, the total impact of adoption of this standard to the earnings per share calculation was less than \$.01 for the three month periods ending March 31, 2017.

Impact to Consolidated Statements of Cash Flows

In addition to the income tax consequences described above, under ASU 2016-09 all tax benefits related to share-based payments are reported as cash flows from operating activities along with all other income tax cash flows. Previously, tax benefits from share-based payment arrangements were reported as cash flows from financing activities. With respect to the classification of tax benefits on the statement of cash flows, ASU 2016-09 allows companies to elect either a prospective or retrospective application. The Company has elected to apply this classification amendment retrospectively. As a result, the Company elected to reclassify \$0.4 million of tax expense previously reported as cash flows from financing activities on the Company's Consolidated Statement of Cash Flows for the three months ended March 31, 2016 as cash flows from operating activities.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows*, which updates the guidance as to how certain cash receipts and cash payments should be presented and classified within the statement of cash flows. The update is intended to reduce the existing diversity in practice. The amended guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, with early adoption permitted, including adoption in an interim period. The Company is in the process of assessing the potential effect the new standard will have on its consolidated financial statements.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(3) Goodwill and Other Intangible Assets

Goodwill represents the cost of an acquisition in excess of the fair values assigned to identifiable net assets acquired. The Company recorded Goodwill of \$307.4 million as part of the HomeLink® acquisition. The carrying value of Goodwill as of December 31, 2016 and March 31, 2017 was \$307.4 million.

In addition to annual impairment testing, which is performed as of the first day of the fourth quarter, the Company continuously monitors for events and circumstances that could negatively impact the key assumptions in determining fair value thus resulting in the need for interim impairment testing, including long-term revenue growth projections, profitability, discount rates, recent market valuations from transactions by comparable companies, volatility in the Company's market capitalization, and general industry, market and macroeconomic conditions. No such events or circumstances in the most recently completed quarter indicated the need for interim impairment testing.

The patents and intangible assets and related change in carrying values are set forth in the tables below:

As of March 31, 2017:

Other Intangible Assets	Gross	Accumulated Amortization	Net	Assumed Useful Life
Gentex Patents	\$ 33,620,379 \$	(17,147,912) \$	16,472,467	various

Exclusive Licensing Agreement	96,000,000	_	96,000,000	Indefinite
Total Other Intangible Assets	\$ 371,000,000 \$	(67,550,000) \$	303,450,000	-
Total Patents & Other Intangible Assets	\$ 404,620,379 \$	(84,697,912) \$	319,922,467	_

As of December 31, 2016:

Other Intangible Assets	Gross	Accumulated Amortization	Net	Assumed Useful Life
Gentex Patents	\$ 33,002,468 \$	(16,481,728) \$	16,520,740	various
HomeLink® Trade Names and Trademarks	\$ 52,000,000 \$	- \$	52,000,000	Indefinite
HomeLink® Technology	180,000,000	(48,750,000) \$	131,250,000	12 years
Existing Customer Platforms	43,000,000	(13,975,000) \$	29,025,000	10 years
Exclusive Licensing Agreement	96,000,000	— \$	96,000,000	Indefinite
Total other identifiable intangible assets	\$ 371,000,000 \$	(62,725,000) \$	308,275,000	
Total Patents & Other Intangible Assets	\$ 404,002,468 \$	(79,206,728) \$	324,795,740	

Amortization expense on patents and intangible assets was approximately \$5.6 million during the three month period ended March 31, 2017, compared to approximately \$5.6 million for the same period ended March 31, 2016.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(3) Goodwill and Other Intangible Assets (continued)

Excluding the impact of any future acquisitions, the Company continues to estimate amortization expense for each of the years ended December 31, 2017, 2018, 2019, 2020 and 2021 to be approximately \$22 million annually.

(4) Investments

The Company follows the provisions of ASC 820, "Fair Value Measurements and Disclosures" for its financial assets and liabilities, and for its non-financial assets and liabilities subject to fair value measurements. ASC 820 provides a framework for measuring the fair value of assets and liabilities. This framework is intended to provide increased consistency in how fair value determinations are made under various existing accounting standards that permit, or in some cases, require estimates of fair-market value. This standard also expanded financial statement disclosure requirements about a company's use of fair-value measurements, including the effect of such measure on earnings. The cost of securities sold is based on the specific identification method.

The Company's common stocks and certain mutual funds are classified as available for sale and are stated at fair value based on quoted market prices, and as such are classified as Level 1 assets. The Company determines the fair value of its government securities, corporate bonds, and certain mutual funds by utilizing monthly valuation statements that are provided by its broker. The broker determines the investment valuation by utilizing the bid price in the market and also refers to third party sources to validate valuations, and as such are classified as Level 2 assets.

The Company's certificates of deposit have remaining maturities of less than one year and are classified as available for sale, and are considered as Level 1 assets. These investments are carried at cost, which approximates fair value.

Assets or liabilities that have recurring fair value measurements are shown below as of March 31, 2017, and December 31, 2016:

As of March 31, 2017:

	Aggregate	Unrealized Losses	Αg	ggregate Fair Value
Less than one year	\$	321,258	\$	51,576,425
Greater than one year		98,163		269,524
Total	\$	419,421	\$	51,845,949

Unrealized losses on investments as of December 31, 2016, are as follows:

	Aggrega	ate Unrealized Losses	Aggregate Fair Value		
Less than one year	\$	767,612	\$	55,574,292	
Greater than one year		151,091		358,120	
Total	\$	918,703	\$	55,932,412	

ASC 320, "Accounting for Certain Investments in Debt and Equity Securities", as amended, provides guidance on determining when an investment is other than temporarily impaired. The Company reviews its equity investment portfolio for any unrealized losses that would be deemed other-than-temporary and require the recognition of an impairment loss in income. If the cost of an investment exceeds its fair value, the Company evaluates, among other factors, general market conditions, the duration and extent to which the fair value is less than cost, and the Company's intent and ability to hold the investments. Management also considers the type of security, related-industry and sector performance, as well as published investment ratings and analyst reports, to evaluate its portfolio. Once a decline in fair value is determined to be other than temporary, an impairment charge is recorded and a new cost basis in the investment is established. If market, industry, and/or investee conditions deteriorate, the Company may incur future impairments. No equity investment losses were considered to be other than temporary during the periods presented. The Company additionally has the intention and current ability to hold its debt investments until the amortized cost basis has been recovered.

Fixed income securities as of March 31, 2017, have contractual maturities as follows:

Due within one year	\$ 150,050,790)
Due between one and five years	17,623,180)
Due over five years		-
	\$ 167,673,970	<u> </u>

(5) Inventories

Inventories consisted of the following at the respective balance sheet dates:

	N	larch 31, 2017	D	ecember 31, 2016
Raw materials	\$	122,534,856	\$	115,099,569

Potentially dilutive shares resulting from stock plans		4,070,938		2,105,732
Denominator for diluted EPS		291,479,838		291,316,353

Shares related to stock plans not included in diluted average common shares outstanding because their effect would be anti-dilutive

2,311 7,866,330

(7) Stock-Based Compensation Plans

As of March 31, 2017, the Company had four equity incentive plans which include two stock option plans, a restricted stock plan and an employee stock purchase plan. All plans and any prior material amendments thereto have previously been approved by shareholders. Readers should refer to Note 5 of our consolidated financial statements in our Annual Report on Form 10-K for the calendar year ended December 31, 2016, for additional information related to these stock-based compensation plans.

The Company recognized compensation expense for share-based payments of \$3,484,240 for the three months ended March 31, 2017, and \$4,022,382 for the three months ended March 31, 2016. Compensation cost capitalized as part of inventory as of March 31, 2017 and 2016 was \$226,119 and \$292,187, respectively.

Employee Stock Option Plan

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(7) Stock-Based Compensation Plans (continued)

The Company has an employee stock option plan covering 24,000,000 shares of common stock. The purpose of the plan is to provide an opportunity to use stock options as a means of recruiting new managerial and technical personnel and as a means for retaining certain employees of the Company and allow them to purchase shares of common stock of the Corporation and thereby have an additional incentive to contribute to the prosperity of the Company.

The fair value of each option grant in the employee stock option plan was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions for the indicated periods:

	Three Months Ende	d March 31,
	2017	2016
Dividend Yield (1)	2.18%	2.15%
Expected volatility (2)	29.81%	34.53%
Risk-free interest rate (3)	2.10%	1.38%
Expected term of options (years) (4)	4.09	4.18
Weighted-avg. grant date fair value	\$4.51	\$3.67

- (1) Represents the Company's estimated cash dividend yield over the expected term of option grant.
- Amount is determined based on analysis of historical price volatility of the Company's common stock. The expected volatility is based on the daily percentage change in the price of the stock over a period equal to the expected term of the option grant.
- (3) Represents the U.S. Treasury yield over the expected term of the option grant.
- Represents the period of time that options granted are expected to be outstanding. Based on analysis of historical option exercise activity, the Company has determined that all employee groups exhibit similar exercise and post-vesting termination behavior.

Under the employee stock option plan, the option exercise price equals the stock's market price on date of grant. The options vest after one to five years, and expire after five to seven years. As of March 31, 2017, there was \$15,329,604 of unrecognized compensation cost related to share-based payments which is expected to be recognized over the vesting periods.

Non-employee Director Stock Option Plan

The Company has a non-employee director stock option plan covering 1,000,000 shares of common stock. As of March 31, 2017, there was no unrecognized compensation cost under the non-employee director plan related to share-based payments. The Company has granted options on 371,000 shares under the non-employee director plan through March 31, 2017. Under the non-employee director plan, the option exercise price equals the stock's market price on the date of grant. The options vest after six months, and expire after ten years.

Employee Stock Purchase Plan

The Company has an employee stock purchase plan covering 2,000,000 shares of common stock. Under the plan, the Company sells shares at 85% of the stock's market price at date of purchase. Under ASC 718, the 15% discounted value is recognized as compensation expense. As of March 31, 2017, the Company has granted 659,810 shares under this plan.

Restricted Stock Plan

The Company has a restricted stock plan covering 9,000,000 shares of common stock. The purpose of the restricted stock plan is to permit grants of shares, subject to restrictions, to employees of the Company as a means of retaining and rewarding them for long-term performance and to increase their ownership in the Company. Shares awarded under the restricted stock plan entitle the shareholder to all rights of common stock ownership except that the shares may not be sold, transferred, pledged, exchanged or otherwise disposed of during the restriction period. The restriction period is determined by the Compensation Committee, appointed by the Board of Directors, but may not exceed ten years under the terms of the plan. As of March 31, 2017,

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(7) Stock-Based Compensation Plans (continued)

the Company had unearned stock-based compensation of \$14,924,917 associated with these restricted stock grants. The unearned stock-based compensation related to these grants is being amortized to compensation expense over the applicable restriction periods. Amortization expense from restricted stock grants in the three months ended March 31, 2017 was \$940,811.

(8) Comprehensive Income

Comprehensive income reflects the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. For the Company, comprehensive income represents net income adjusted for unrealized gains and losses on certain investments, foreign currency translation adjustments, and derivatives.

The following table presents the net changes in the Company's accumulated other comprehensive income (loss) by component: (All amounts shown are net of tax).

	Three Months Ended March 31,			March 31,

(9) Debt and Financing Arrangements

Credit Agreement

On September 27, 2013, the Company entered into a Credit Agreement ("Credit Agreement") with certain banks and agents.

Pursuant to the Credit Agreement, the Company is borrower under a \$150 million senior revolving credit facility ("Revolver") and a \$150 million term loan facility ("Term Loan"). Under the terms of the Credit Agreement, the Company is entitled, to further request an additional aggregate principal amount of up to \$75 million, subject to the satisfaction of certain conditions. In addition, the Company is entitled to the benefit of swing loans from amounts otherwise available under the Revolver in the aggregate principal amount of up to \$20 million and to request Letters of Credit from amounts otherwise available under the Revolver in the aggregate principle amount up to \$20 million, both subject to certain conditions. The obligations of the Company under the Credit Agreement are not secured, but are subject to certain covenants. The Revolver expires and the Term Loan matures on September 27, 2018.

During the three months ended March 31, 2017, the Company made principal repayments of \$41.9 million, plus accrued interest, on the Term Loan and Revolver. The aforementioned payments include a payment made by the Company of \$40.0 million on the Revolver during the first quarter of 2017, which was in addition to scheduled amounts due. The Company used cash and cash equivalents to fund the payments. The Company additionally reclassified \$100 million of long-term debt to short-term debt as a result of the Company's current plans to make accelerated debt payments over the course of the next year. As of March 31, 2017, \$20.8 million was outstanding on the Revolver with availability of an additional \$129.2 million. Under current terms of the Term Loan, the Company is required to make principal repayments of \$7.5 million annually, but currently intends to make accelerated debt repayments through the maturity date of the Term Loan. As of March 31, 2017, \$123.8 million was outstanding under the Term Loan.

As of March 31, 2017, the borrowing rate on both its Term Loan and Revolver are derived from the one month LIBOR, and based on the Company's leverage ratio as of March 31, 2017, the interest rate on its borrowings is equal to 1.99%. Interest expense is netted within the "Other, net" section of the Condensed Consolidated Statements of Income, and interest expense associated with the Term Loan and Revolver was \$0.9 million during the three months ended March 31, 2017, and \$0.9 million during the three months ended March 31, 2016.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(9) Debt and Financing Arrangements (continued)

The Credit Agreement contains customary representations and warranties and certain covenants that place certain limitations on the Company.

As of March 31, 2017, the Company was in compliance with its covenants under the Credit Agreement.

Interest Rate Swap

On October 1, 2014 the Company entered into an interest rate swap transaction with a bank ("Counterparty"). The Counterparty is among the syndicate of lenders under the existing Credit Agreement entered into on September 27, 2013. The Company entered into the interest rate swap transaction to mitigate the Company's floating rate interest risk on an aggregate of \$150 million of the Company's debt that is currently outstanding under the Credit Agreement. The interest rate swap has an effective date of July 31, 2015 and a termination date of September 27, 2018 (which is the expiration date of the Credit Agreement). The Company is required to make certain monthly fixed rate payments to the Counterparty calculated on a notional amount of \$150 million for the rate swap, while the Counterparty is obligated to make monthly floating rate payments to the Company referencing the same notional amount. The interest rate swap transaction has the effect of fixing the annual interest rate payable on \$150 million of the Company's outstanding debt under its existing credit facility to 1.89%, as of the effective date. The notional amounts of the interest rate swap agreement are used to measure interest to be paid or received and do not represent the amount of exposure to credit loss. This derivative instrument has been designated as a cash flow hedge of the variable interest payments on the related debt.

Interest expense are netted within the "Other, net" section of the Condensed Consolidated Statements of Income, and interest expense associated with the interest rate swap was \$0.4 million during the three months ended March 31, 2017, and \$0.6 million during the three months ended March 31, 2016.

Notwithstanding the terms of the interest rate swap transaction, the Company is ultimately obligated for all amounts due and payable under its existing Credit Agreement.

The notional amount of the Company's derivative instruments are as follows:

	March 31, 2017	December 31, 2016		
Interest Rate Swap	\$ 150,000,000	\$	150,000,000	

The following table sets forth financial assets and liabilities measured at fair value related to the interest rate swap agreement and the respective pricing levels to which the fair value measurements are classified within the fair value hierarchy. The Company uses the market approach to derive the value of its level 2 fair value measurements. Interest rate swaps are valued using publicized swap curves.

Fair Value Measurements				
Quoted Prices with Other Observable Inputs (Level 2)				
	Ma	arch 31, 2017	Dec	ember 31, 2016
Financial assets:			<u> </u>	
Interest Rate Swap Asset	\$	_	\$	_
Financial Liabilities:				
Interest Rate Swap Liability (Other Accrued Liabilities)	\$	1,199,995	\$	1,841,970

Based on loan balances as of March 31, 2017 and the effective interest swap date of July 31, 2015, a one percent increase in the Company's borrowing rate would increase net interest expense paid by the Company on its borrowings by less than \$0.1 million dollars on an annual basis.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Table of Contents

(10) Equity

The increase in common stock during the three months ended March 31, 2017, was primarily due to the issuance of 1,511,640 shares of the Company's common stock under the Company's stock-based compensation plans, which was partially offset by share repurchases of 1,473,403 shares pursuant to the Company's previously announced share repurchase plan, for a net increase of 38,237 shares.

The Company announced a \$.005 per share increase in its quarterly cash dividend rate during the second quarter of 2016. As such, the Company recorded a cash dividend of \$0.090 during the first quarter of 2017 as compared to a cash dividend of \$.085 per share during the first quarter of 2016. The first quarter 2017 dividend of \$25.9 million, was declared on March 6, 2017, and was paid on April 19, 2017.

(11) Contingencies

The Company is periodically involved in legal proceedings, legal actions and claims arising in the normal course of business, including proceedings relating to product liability, intellectual property, safety and health, employment and other matters. Such matters are subject to many uncertainties and outcomes are not predictable. The Company does not believe, however, that at the current time any of these matters constitute material pending legal proceedings that will have a material adverse effect on the financial position or future results of operations of the Company.

(12) Segment Reporting

The Company's automotive segment develops and manufactures electro-optic products and electronics, including: automatic-dimming rearview mirrors with and without electronic features; non-auto dimming rearview mirrors with and without electronic features; and other electronics. The Company also develops and manufactures variably dimming windows for the aerospace industry and fire protection products for the commercial construction industry, which are combined into the "Other" segment shown below.

	Three Months Ended March 31,				
	2017		2016		
Revenue:					
Automotive Products	\$ 445,652,575	\$	393,968,947		
Other	7,882,675		11,598,839		
Total	\$ 453,535,250	\$	405,567,786		
Income from operations:					
Automotive Products	\$ 132,504,957	\$	115,980,617		
Other	1,922,163		4,868,373		
Total	\$ 134,427,120	\$	120,848,990		

(13) Income Taxes

The effective tax rate was 27.7% in the three months ended March 31, 2017 compared to 32.9% for the same period in 2016. Effective tax rates for these quarters differ from statutory federal income tax rates, due to the domestic manufacturing deduction, provisions for state and local income taxes and permanent tax differences. The decrease in the effective tax rate for the three months ended March 31, 2017 compared to the same period of 2016 is primarily due to favorable discrete items that impacted the Company's tax provision in the amount of \$5.6 million, of which \$3.8 million was related to a change in tax method and \$1.8 million was related to the adoption of ASU 2016-09 during the most recently completed quarter, which requires prospective recognition of excess tax benefits and deficiencies from stock-based compensation arrangements in the income statement as a component of the income tax provision. The new ASU and its impacts on the Company's Consolidated Statements of Income and Statements of Cash Flows are further described in Note 2 of the Notes to the Consolidated Financial Statements in this Form 10-Q.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

RESULTS OF OPERATIONS:

FIRST QUARTER 2017 VERSUS FIRST QUARTER 2016

Net Sales. Net sales for the first quarter of 2017 increased by \$48.0 million or 12% when compared with the first quarter of 2016.

Automotive net sales for the first quarter of 2017 increased 13% to \$445.6 million, compared with automotive net sales of \$394.0 million in the first quarter of 2016, driven primarily by a 12% quarter-over-quarter increase in automotive mirror unit shipments and favorable shifts in product mix. North American automotive mirror unit shipments in the first quarter of 2017 increased 5% to 3.3 million units compared with the first quarter of 2016, primarily due to increased penetration of the Company's exterior auto-dimming mirrors. International automotive mirror unit shipments in the first quarter of 2017 increased 16% to 6.6 million units compared with the first quarter of 2016, primarily due to increased penetration of the Company's interior and exterior auto-dimming mirrors.

The below table represents the Company's auto dimming mirror unit shipments for the three months ended March 31, 2017, and 2016. (in thousands)

	Three Months Ended March 31,		
	2017	2016	% Change
North American Interior Mirrors	2,359	2,260	4%
North American Exterior Mirrors	916	864	6%
Total North American Mirror Units	3,276	3,124	5%
International Interior Mirrors	4,818	4,121	17%
International Exterior Mirrors	1,826	1,582	15%
Total International Mirror Units	6,643	5,703	16%
Total Interior Mirrors	7,177	6,381	12%
Total Exterior Mirrors	2,742	2,447	12%
Total Auto-Dimming Mirror Units	9,919	8,827	12%

Note: Percent change and amounts may not total due to rounding.

Other net sales were \$7.9 million in the first quarter of 2017, compared to \$11.6 million in the first quarter of 2016.

<u>Cost of Goods Sold.</u> As a percentage of net sales, cost of goods sold increased to 61.2% for the first quarter of 2017 versus 60.9% in the first quarter of 2016. The quarter over quarter net decrease in the gross profit margin was the result of annual customer price reductions, which was partially offset by purchasing cost reductions and favorable product mix. Annual customer price reductions had a negative impact of approximately 150 - 200 basis points, while purchasing cost reductions and favorable product mix each had a positive impact of approximately 50 - 100 basis points.

<u>Operating Expenses.</u> Engineering, research and development (E, R & D) expenses for the first quarter of 2017 increased 9% or \$2.1 million when compared with the first quarter of 2016, primarily due to increased staffing levels which continue to support growth and the development of new business.

Selling, general and administrative (S, G & A) expenses increased by 10% or \$1.5 million for the first quarter of 2017 compared to the first quarter of 2016. S, G & A expenses, notwithstanding the quarter over quarter increase, remained at approximately 4% of net sales in the first quarter of 2017 and in the first quarter of 2016. S, G, & A expenses increased primarily due to increased staffing levels and benefits.

Total operating expenses were \$41.4 million in the first quarter of 2017, which increased 9% or \$3.5 million from \$37.8 million in the first quarter of 2016.

<u>Total Other (Loss) Income</u>. Total other income for the first quarter of 2017 increased by \$1.7 million when compared with the first quarter of 2016, primarily due to an increase in investment income and realized gains on the sale of equity investments in the first quarter of 2017 versus the same quarter in the prior year.

<u>Provision for Income Taxes.</u> The effective tax rate was 27.7% in the first quarter of 2017 compared to 32.9% for same quarter of 2016. Effective tax rates differ from statutory federal income tax rates, due to the domestic manufacturing deduction, provisions for state and local income taxes and permanent tax differences. The decrease in the effective tax rate for the first quarter of 2017 compared to the same period of 2016 is primarily due to favorable discrete items that impacted the Company's tax provision in the amount of \$5.6 million, of which \$3.8 million was related to a change in tax method and \$1.8 million was related to the adoption of ASU 2016-09 during the most recently completed quarter, which requires prospective recognition of excess tax benefits and deficiencies from stock-based compensation arrangements in the income statement as a component of the income tax provision. The new ASU and its impacts on the Company's Consolidated Statements of Income and Statements of Cash Flows are further described in Note 2 of the Notes to the Consolidated Financial Statements in this Form 10-Q.

<u>Net Income.</u> Net income for the first quarter of 2017 increased by \$17.3 million or 22% when compared with the first quarter of 2016, due to increases in sales and the favorable tax impacts related to the discrete tax items previously described.

FINANCIAL CONDITION:

The Company's cash and cash equivalents as of March 31, 2017 was \$559.6 million, which increased approximately \$13.2 million compared to \$546.5 million as of December 31, 2016. The increase was primarily due to positive cash flow from operations, but was somewhat offset by the accelerated repayment of debt, capital expenditures, dividends, and share repurchases during the three months ended March 31, 2017.

Short-term investments as of March 31, 2017 were \$176.6 million, compared to \$177.0 million as of December 31, 2016 and Long-term investments were \$61.5 million as of March 31, 2017, up from \$49.9 million as of December 31, 2016, partially due to positive investment performance resulting in increased unrealized gains for the quarter.

Accounts receivable as of March 31, 2017 increased approximately \$37.9 million compared to December 31, 2016, primarily due to the higher sales level, as well as timing of sales within the quarters.

Inventories as of March 31, 2017 increased approximately \$7.8 million when compared to December 31, 2016, primarily due to increases in raw materials to meet forecasted production demand.

Accounts payable as of March 31, 2017 decreased approximately \$2.2 million when compared to December 31, 2016 primarily due to the timing of certain purchases and payments within the quarters.

Accrued liabilities as of March 31, 2017 increased approximately \$126.7 million compared to December 31, 2016, primarily due to the reclassification of \$100 million of long-term debt to short-term debt as a result of the Company's plans to make accelerated debt payments over the course of the next year. The remainder of the increase is a result of increased accrued taxes and compensation, reflecting the timing of certain tax and compensation payments.

Long term debt as of March 31, 2017 decreased by \$141.9 million compared to December 31, 2016, due to the Company's principal repayments on its term and revolver loans, further explained in Note 9 to the Unaudited Condensed Consolidated Financial Statements, as well as the aforementioned reclassification of \$100 million of debt from long-term to short-term.

Cash flow from operating activities for the three months ended March 31, 2017, decreased \$20.7 million to \$131.2 million, compared with \$151.9 million during the same three month period last year, primarily due to changes in working capital, which was partially offset by increases in net income.

Capital expenditures for the three months ended March 31, 2017 were approximately \$27.1 million, compared with approximately \$20.3 million for the same three month period last year.

The Company believes its existing and planned facilities are currently suitable, adequate, and have the capacity required for current and near-term planned business. Nevertheless, the Company continues to evaluate longer

term facilities needs. For example, in 2014, the Company began construction of a 250,000 square-foot manufacturing and distribution facility located at a 140 acre site in Zeeland Michigan, where the Company previously performed master planning and completed land infrastructure improvements. Both the distribution and manufacturing portions of the facility are now currently operational.

The Company estimates that it currently has building capacity to manufacture approximately 30 - 33 million interior mirror units annually and approximately 13 - 15 million exterior mirror units annually, based on current product mix. The Company evaluates equipment capacity on an ongoing basis and adds equipment as needed.

Management considers the current working capital and long-term investments, as well as the debt financing arrangement (notwithstanding its prohibitions on incurring additional indebtedness), discussed further in Note 9 to the Unaudited Condensed Consolidated Financial Statements, in addition to internally generated cash flow, to be sufficient to cover anticipated cash needs for the foreseeable future considering its contractual obligations and commitments. The following is a summary of working capital and long-term investments:

	March 31, 2017		December 31, 2016	
Working Capital	\$	920,201,809	\$	1,005,131,050
Long Term Investments		61,512,162		49,894,363
Total	\$	981,713,971	\$	1,055,025,413

The decrease in working capital as of March 31, 2017 is primarily due to the reclassification of \$100 million of long-term debt to short-term debt as a result of the Company's plans to make accelerated debt payments over the course of the next year. The Company believes it has the ability to make such accelerated debt payments.

The Company has a previously announced share repurchase plan under which the Board of Directors has authorized the repurchase of shares of the Company's common stock based on market conditions, the market price of the stock, anti-dilutive effect on earnings, available cash and other factors that the Company deems appropriate. During the three months ended March 31, 2017, the Company repurchased 1,473,403 shares, respectively, under this share repurchase plan. The Company has 5,272,417 shares remaining under the plan as of March 31, 2017, as is further detailed in Part II, Item 2 of this Form 10-Q.

BUSINESS UPDATE

The Company's unit growth continues to outpace vehicle production growth in large part due to the many different product launches that have been executed in 2016 and year to date in 2017. The Company's unit and revenue growth continues to be driven by the Company's electrochromic technology, including a number of vehicles as new applications, as well as certain other advanced features.

Interior and exterior auto-dimming mirrors and advanced electronic features were launched on a net new 11 vehicle models during the first quarter of 2017. These launches consist of products involving approximately 50% advanced features. While lower than the mix experience for calendar year 2016, this mix is consistent with preceding years.

Historically, the Company has been able to deliver higher than average margins when it has added electronic content faster than unit growth when combined with growth in unit penetration. These net additional vehicle models offering the Company's interior, exterior, and advanced feature products, as well as further penetration of its products on existing models, helped drive a 12% organic growth rate for interior mirrors and a 12% organic growth rate for exterior mirrors during the first quarter of 2017 compared to the same quarter in the prior year, against a 3% quarter over quarter increase in light vehicle production in the Company's primary markets.

PRODUCT UPDATE

The Full Display Mirror® began production in the fourth quarter of 2015. Current automotive design trends are yielding vehicles with small rear windows that are often further obstructed by headrests, passengers, and roof support pillars which can significantly hinder the mirror's rearward view. The Company's Full Display Mirror® is an intelligent rear vision system that uses a custom, externally mounted video camera and mirror-integrated

video display to optimize a vehicle driver's rearward view. This rear vision system consists of a hybrid Full Display Mirror® that offers bimodal functionality. In mirror mode, the product functions as an auto-dimming rearview mirror which means that during nighttime driving, digital light sensors talk to one another via a microprocessor to automatically darken the mirror when glare is detected. With the flip of a switch, the mirror enters display mode, and a clear, bright display appears through the mirror's reflective surface, providing a wide, unobstructed rearward view. The bi-modality of the Full Display Mirror® is essential, because in the event of any failure of the camera or display, the product is able to function as a standard mirror, which is a long-standing safety requirement in the automotive industry. In addition, the driver has the ability to switch between modes to accommodate usage preferences for various weather conditions, lighting conditions, and driving tasks. The Company continues to work on the development and launch of the Full Display Mirror® for its initial five customers. As of the first quarter of 2017, the Company is currently shipping production Full Display Mirrors to two of the five OEMs. For the second OEM, the Company is the system supplier, which includes the rearward facing camera in addition to the Full Display Mirror®. The Company continues to see interest from other automotive OEMs as well.

During the first quarter of 2017, the Company introduced a new three-camera rear vision system that streams rear video in multiple composite views to its Full Display Mirror®. The Company believes it is the industry's first practical and comprehensive rear vision solution designed to meet automaker, driver, safety and regulatory requirements. The Company's rear vision system, known as a camera monitoring system (CMS), uses three cameras to provide a comprehensive view of the sides and rear of the vehicle. The side-view cameras are discretely housed in downsized, automatic-dimming exterior mirrors. Their video feeds are combined with that of a roof-mounted camera and stitched together into multiple composite views, which are streamed to the driver using the Full Display Mirror®. The system's modular nature lets the automaker customize functionality while offering it as a priceable, optional feature all while enhancing safety by allowing the system to fail safe. Failures due to weather conditions or system failure that disrupt the digital view, allow drivers to use the interior and exterior mirrors. The system also supports user preference by permitting drivers to use standard mirror views, camera views, or both. Downsized exterior mirrors provide automakers with significant weight savings and fuel efficiency improvements. To further enhance safety, the Company's CMS solution can also work in conjunction with a vehicle's side blind zone warning system. When a trailing vehicle enters a side blind zone, a warning indicator illuminates in both the interior and exterior mirrors while the corresponding side-view video feed appears in the display until the vehicle passes.

On March 31, 2014, the Alliance of Automobile Manufacturers petitioned NHTSA to allow automakers to use cameras as an option to replace conventional rearview mirrors within the United States, however, no final ruling or legislation was made in response to this petition. In July 2016, a revision to UN-ECE Regulation 46 was published with an effective date of June 18, 2016, which allows for camera monitor systems to replace mirrors within Japan and European countries. As of January 2017, Camera monitoring systems are also permitted as an alternative to replace mirrors in the Korean market. By using different types of flat and curved glass, combined with simple alterations to the video viewing modes, the Company's CMS system, discussed above, can be tuned to meet the various regulatory field-of-view requirements within the aforementioned regions which allow camera monitoring systems to replace mirrors. However, notwithstanding the foregoing, the Company continues to believe rearview mirrors provide a robust, simple and cost effective means to view the surrounding areas of a vehicle and will remain the primary safety function for rear vision today. Cameras, when used as the sole rear vision delivery mechanism have some inherent limitations such as: electrical failure; cameras being blocked or obstructed; depth perception challenges; and viewing angle of the camera. The Company believes that combining video displays with mirrors may well provide a more robust product by addressing all driving conditions in a single solution that can be controlled by the driver. The Company acknowledges that as such technology evolves over time, there could be increased competition.

The Company's HomeLink® products are the auto industry's most widely used and trusted car-to-home communication system system, with an estimated 50 million units on the road. The system consists of three in-vehicle buttons that can be programmed to operate garage doors, security gates, home lighting, and other radio-frequency-controlled (RF) devices. During the first quarter of 2017, the Company demonstrated the next generation of HomeLink®, which uses both RF and wireless cloud-based connectivity to deliver complete vehicle-to-home automation. With the next-generation HomeLink®, a HomeLink® button press communicates with the HomeLink® app on the user's smartphone via Bluetooth Low Energy. The app contains pre-defined, user-programmed actions, from single device operations to entire home automation scenes. The app, in turn, communicates to the home's smart hub over the cloud server network and activates the appropriate devices, including security systems, door locks, thermostats, lighting, and other home automation devices. providing

comprehensive vehicle-to-home automation, which provides the ability to prepare the home for arrival or departure with one button press. For the automaker, it allows them to offer a customizable yet proven solution without the engineering effort or security concerns associated with integrating the software into the vehicle's computer network. The Company also continues to work on providing HomeLink® applications for alternative automobile and vehicle types which include but are not limited to motorcycles, mopeds, snowmobiles, tractors, combines, lawn mowers, loaders, bulldozers, road-graders, backhoes and golf carts. The Company has also been working with compatibility partners for HomeLink® applications in new markets like China. The unique attributes of the China market allow for potential new use cases of these products and offer what the Company believes to be a real opportunity for growth of the HomeLink® brand and products. In 2017, the Company has begun its first volume production shipments of HomeLink® units on vehicles for the China market

In January 2016, the Company announced a partnership with TransCore to provide automobile manufacturers with a vehicle-integrated tolling solution that enables motorists to drive on all U.S. toll roads without a traditional toll tag on the windshield. Currently more than 75 percent of new car registrations are in states with toll roads with over 50 million drivers accessing these roads each year. The Company signed an exclusive agreement, in the ordinary course of business, to integrate TransCore's toll module technology into the Company's electronic rearview mirrors. In January 2017, the Company signed an extension of its agreement in the ordinary course of business, which enables the Company to offer the Integrated Toll Module system in Canada and Mexico. The interior mirror is the optimal location for a vehicle-integrated toll transponder and it eliminates the need to affix multiple toll tags to the windshield and helps automakers seamlessly integrate toll collection into the car. Since the Integrated Toll Module® or "ITMI® enables travel across all North American toll roads, motorists would no longer need multiple toll tags for different regions of the country or to manage multiple toll accounts. The Company's vehicle-integrated solution simplifies and expedites local, regional, and national travel. ITM® provides transportation agencies with an interoperability solution without costly infrastructure changes to the thousands of miles of toll lanes throughout the country. The Company believes that this product could potentially represent another growth opportunity over the next several years. The Company has its first OEM award of ITM® with production deliveries currently scheduled for calendar year 2019, which may vary based on automaker vehicle launch timing.

During the first quarter of 2017, the Company introduced a new vehicle-based biometric identification system that authenticates the driver and delivers customized security, comfort and convenience features. The system can also be used to help secure and enhance vehicle-to-home automation services as well as vehicle-to-infrastructure transactions. Upon entering the vehicle, the biometric system would identify the driver with an iris scan, and, if authorized, start the car and personalize setup by automatically adjusting mirrors, steering wheel, seat position, music favorites, GPS locations, and others. The Company's biometrics system is integrated into an automatic-dimming rearview mirror and related windscreen mount. The mirror is the ideal integration position, as it is a natural location for the driver when entering the vehicle. In addition, it provides a consistent feature location across vehicle platforms and can share other electronic components. The Company's automotive biometric solution stems from a strategic partnership with Delta ID, which has developed an ActiveIRIS® technology that combines unique iris-recognition software with a simple hardware set that can be easily integrated into mobile computing devices. The Company and Delta ID completed a strategic partnership agreement in the ordinary course of business for automotive applications. Iris recognition is among the most secure form of biometric identification, with a false acceptance rate as low as one in 10 million, far superior to facial, voice, and other biometric systems. The Company's future plans include integrating biometric authentication with HomeLink®. The biometric system will allow HomeLink® to provide added security and convenience for multiple drivers by activating the unique home automation presets of different authorized users.

SmartBeam® is the Company's proprietary high beam control system integrated into its auto-dimming mirror. SmartBeam® Generation 4, which was developed using the fourth generation of the Company's custom designed CMOS imager, has an advanced feature set made possible by the high dynamic range of the imager including: high beam assist; dynamic forward lighting with high beams constantly on; LED matrix beam; and a variety of specific detection applications including tunnel, fog and road type as well as certain lane tracking features to assist with lighting control. The Company has the ability to package the control electronics inside of its interior rearview mirrors with a self-calibrating camera attached to the mirror mount with optimal mechanical packaging which also provides for ease of service. In addition, the Company has long been integrating its camera products to optimize performance by fusing with other systems on the vehicle, including radar, navigation, steering and related modules provided by other suppliers. This enables the Company to provide its customers with a highly customizable solution that meets their unique needs and specifications.

On December 8, 2015 the National Highway Traffic Safety Administration (NHTSA) proposed changes to the NHTSA's 5-Star Safety Ratings for new vehicles (also known as the New Car Assessment Program or NCAP) and initiated a comment period. The proposed changes will, for the first time, encompass assessment of crash-avoidance technologies, which includes lower beam headlamp performance, semi-automatic headlamp switching, and blind spot detection. At this time, NHTSA intends to implement the enhancements in NCAP in 2018 beginning with model year 2019 vehicles. In January 2017, NHTSA, published a notice on SafeCar.gov stating the new goal for implementation was calendar year 2019 for model year 2020; however, the notice has been removed from the aforementioned website after the January 20, 2017 Regulatory Freeze Pending Review Memorandum from the Trump Administration. The Company believes that its SmartBeam® technology will qualify with the semi-automatic headlamp NCAP rating system, and that its SmartBeam® technology and exterior mirrors with blind spot alert lighting can be included in a system that qualifies with the lower beam headlamp performance and blind spot detection NCAP rating system, respectively.

In 2014, the NHTSA issued a final rule requiring rearview video systems in U.S. light vehicles by May 1, 2018, with a phase-in schedule requirement of 10% of vehicles after May 2016, 40% of vehicles after May 2017, and 100% of vehicles after May 2018. In this release, NHTSA estimated that 57% of model year 2014 vehicles already have a rear video system, and that even without a final rule, 73% of the vehicles sold into North America would have already included a rearview video system by 2018. This NHTSA ruling, as is indicated from the percentage of U.S. vehicles already having a solution, does not currently indicate an immediate opportunity for new Rear Camera Display (RCD) mirror applications for the Company. Customer opportunities for RCD mirror applications may exist by the time the 100% requirement is in place, but there is no certainty that is the case at this time. The Company's RCD mirror application meets all the technical requirements of the NHTSA ruling when installed in a vehicle and appropriately paired with an OEM specified camera. The NHTSA ruling that rearview video systems are required has increased competition for systems capable of rear video in a variety of locations in the vehicle. The Company's RCD mirror application has and will continue to be affected by this increased competition.

OTHER

Automotive revenues represent approximately 98% of the Company's total revenue, consisting of interior and exterior electrochromic automatic-dimming rearview mirrors and automotive electronics.

The Company does continue to experience pricing pressure from its automotive customers and competitors, which will continue to cause downward pressure on its sales and profit margins. The Company works continuously to offset these price reductions with engineering and purchasing cost reductions, productivity improvements, and increases in unit sales volume, but there is no assurance the Company will be able to do so in the future.

Because the Company sells its products throughout the world, and automotive manufacturing is highly dependent on economic conditions, the Company can be affected by uncertain economic conditions that can reduce demand for its products.

The Company previously announced that it is providing variably dimmable windows for the Boeing 787 Dreamliner series of aircraft. The Company continues to work with aircraft manufacturers that have an interest in this technology regarding potential additional programs.

The Company believes that its patents and trade secrets provide it with a competitive advantage in automotive rearview mirrors and other electronic features that it offers in vehicles and aerospace windows. Claims of patent infringement can be costly and time-consuming to address. To that end, the Company obtains intellectual property rights in the ordinary course of business to strengthen its intellectual property portfolio to minimize the risk of infringement.

The Company does not have any significant off-balance sheet arrangements or commitments that have not been recorded in its consolidated financial statements.

OUTLOOK

The Company utilizes the light vehicle production forecasting services of IHS Worldwide, and using the mid-April 2017 light vehicle production forecasts indicated in the table below, the Company has updated certain guidance for calendar year 2017.

Light Vehicle Production (per IHS Automotive April light vehicle production forecast)

(in Millions)

Region	2Q 2017	2Q 2016	% Change	3Q 2017	3Q 2016	% Change	Calendar Year 2017	Calendar Year 2016	% Change
North America	4.6	4.6	- %	4.2	4.4	(5)%	17.5	17.8	(2)%
Europe	5.6	5.9	(5)%	4.8	4.8	— %	21.9	21.5	2 %
Japan and Korea	3.2	3.1	3 %	3.3	3.0	10 %	13.3	12.9	3 %
Total Light Vehicle Production	13.4	13.6	(1)%	12.3	12.2	1 %	52.7	52.2	1 %

The Company continues to estimate that top line revenue for calendar year 2017 will be between \$1.78 and \$1.85 billion. However, based on weakening light vehicle production estimates in Europe for the second quarter of 2017 and in North America in the third quarter of 2017, the Company expects its revenues for the second and third quarters of 2017 to be at or around the lower end of its annual guidance range for revenue, but expects the fourth quarter revenues to be at or around the higher end of its annual guidance range. All estimates are based on light vehicle production forecasts in the regions to which the Company ships product, as well as the estimated option rates for its mirrors on prospective vehicle models and anticipated product mix.

The Company continues to see order rates and booked business that allow for these estimates despite modest vehicle production increases in our primary markets. Nevertheless, uncertainties remain including: light vehicle production levels; supplier part shortages; automotive plant shutdowns; sales rates in Europe, Asia and North America; OEM strategies and cost pressures; customer inventory management and the impact of potential automotive customer (including their Tier 1 suppliers) and supplier bankruptcies; work stoppages, strikes, etc., which could disrupt shipments to these customers, make forecasting difficult.

Based on actual results for the first quarter, currently forecasted sales and product mix, the Company continues to estimate that the gross profit margin will be between 39.0% and 40.0% for calendar year 2017.

The Company also continues to estimate that its operating expenses, which include engineering, research and development expenses and selling, general and administrative expenses are expected to be between \$165 and \$172 million for calendar year 2017, primarily due to staffing and benefit costs which continue to support growth and the development of new business. The Company also plans to continue to invest in selling and marketing efforts at a rate of growth that approximates the rate of sales growth for the Company.

In light of on-going demand for the Company's auto-dimming mirrors and electronics, the Company currently continues to anticipate that 2017 capital expenditures will be approximately \$115 - \$130 million, a majority of which will be production equipment purchases. 2017 capital expenditures are currently anticipated to be financed from current cash and cash equivalents on hand and cash flows from operating activities.

The Company also continues to estimate that depreciation and amortization expense for calendar year 2017 will be approximately \$95 - \$105 million.

The Company also continues to estimate that its tax rate will be between 31.5% and 32.5% for calendar year 2017, based on existing tax laws and excluding discrete items. The adoption of ASU 2016-09 during the current year, as further explained in Note 2 to the Unaudited Condensed Consolidated Financial Statements, could cause variability in the Company's effective tax rate in the future, depending on employee stock option exercise activity and the price of the Company's common stock.

The Company also intends to continue to repurchase additional shares of its common stock in 2017 and into the future depending on a number of factors, including: market, economic, and industry conditions; the market price of the Company's common stock; anti-dilutive effect on earnings; available cash; and other factors that the Company deems appropriate.

Finally, based on 2018 light vehicle production forecasts and current forecasted product mix, the Company is making no changes to its previously announced revenue estimates for calendar year 2018.

CRITICAL ACCOUNTING POLICIES:

The preparation of the Company's consolidated condensed financial statements contained in this report, which have been prepared in accordance with accounting principles generally accepted in the United States, requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. On an ongoing basis, management evaluates these estimates. Estimates are based on historical experience and/or on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that may not be readily apparent from other sources. Historically, actual results have not been materially different from the Company's estimates. However, actual results may differ from these estimates under different assumptions or conditions.

The Company has identified critical accounting policies used in determining estimates and assumptions in the amounts reported in its Management's Discussion and Analysis of Financial Condition and Results of Operations in its Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Item 3. Quantitative And Qualitative Disclosures About Market Risk.

The Company is subject to market risk exposures of varying correlations and volatilities, including foreign exchange rate risk, interest rate risk, and equity price risk. Volatile equity markets could negatively impact the Company's financial performance due to realized losses on the sale of equity investments and/or recognized losses due to other-than-temporary impairment adjustment on available for sale securities (mark-to-market adjustments). During the quarter ended March 31, 2017, there are no material changes in the risk factors previously disclosed in the Company's report on Form 10-K for the fiscal year ended December 31, 2016, except as set forth in Item 2.

The Company has some assets, liabilities and operations outside the United States, including euro-denominated accounts, which currently are not significant overall to the Company as a whole. Because the Company sells its automotive mirrors throughout the world, and automotive manufacturing is highly dependent on general economic conditions, the Company could be affected by uncertain economic conditions in foreign markets that can reduce demand for its products.

On October 1, 2014 the Company entered into an interest rate swap transaction with a bank. Please refer to Note 9 of the Notes to the Consolidated Financial statements in this Form 10-Q for further details.

Item 4. Controls And Procedures.

Evaluation of Disclosure Controls and Procedures.

Under the supervision of, and with the participation of management, the Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of March 31, 2017, and have concluded that as of that date, the Company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the quarter ended March 31, 2017, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

SAFE HARBOR STATEMENT:

This Quarterly Report contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The statements contained in this communication that are not purely historical are forward-looking statements. Forward-looking statements give the Company's current expectations or forecasts of future events. These forward-looking statements generally can be identified by the use of words such as "anticipate", "believe", "could", "estimate", "expect", "forecast", "goal", "hope", "may", "plan", "project", "will", and variations of such words and similar expressions. Such statements are subject to risks and uncertainties that are often difficult to predict and beyond the Company's control, and could cause the Company's results to differ materially from those described. These risks and uncertainties include, without limitation: changes in general industry or regional market conditions; changes in consumer

and customer preferences for our products (such as cameras replacing mirrors and/or autonomous driving); our ability to be awarded new business; continued uncertainty in pricing negotiations with customers; loss of business from increased competition; changes in strategic relationships; customer bankruptcies or divestiture of customer brands; fluctuation in vehicle production schedules; changes in product mix; raw material shortages; higher raw material, fuel, energy and other costs; unfavorable fluctuations in currencies or interest rates in the regions in which we operate; costs or difficulties related to the integration and/or ability to maximize the value of any new or acquired technologies and businesses; changes in regulatory conditions; warranty and recall claims and other litigation and customer reactions thereto; possible adverse results of pending or future litigation or infringement claims; changes in tax laws; import and export duty and associated litigations including securities litigations relating to the conduct of our business. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date they are made. The Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law or the rules of the NASDAQ Global Select Market.

PART II—OTHER INFORMATION

Item 1A. Risk Factors.

Information regarding risk factors appears in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part I – Item 2 of this Form 10-Q and in Part I – Item 1A – Risk Factors of the Company's report on Form 10-K for the fiscal year ended December 31, 2016. There have been no material changes from the risk factors previously disclosed in the Company's report on Form 10-K for the year ended December 31, 2016, except to the extent described in Part I – Item 2 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Issuer Purchase of Equity Securities

On October 8, 2002, the Company announced a share repurchase plan, under which it may purchase up to 16,000,000 shares (post-split) based on a number of factors. On July 20, 2005, the Company announced that it had raised the price at which the Company may repurchase shares under the existing plan. On May 16, 2006, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 16,000,000 shares (post-split) under the plan. On August 14, 2006, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 8,000,000 shares (post-split) under the plan. On October 23, 2012, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 8,000,000 shares (post-split) under the plan. On October 23, 2012, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 8,000,000 shares (post - split) under the plan. On October 21, 2015, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 5,000,000 shares (post - split) under the plan. On October 20, 2016, the Company announced that the Company's Board of Directors authorized the repurchase of an additional 5,000,000 shares (post-split) under the plan. On October 20, 2016, the Company announced that the Company's Board of Directors had authorized the repurchase of an additional 7,500,000 shares (post - split) under the plan. The Company may purchase authorized shares of its common stock under the plan based on a number of factors, including: market, economic, and industry conditions; the market price of the Company's common stock; anti-dilutive effect on earnings; available cash; and other factors that the Company deems appropriate. The plan does not have an expiration date, but the Board of Directors reviews such plan periodically.

The following is a summary of share repurchase activity during the three months ended March 31, 2017:

Issuer Purchase of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchase As Part of a Publicly Announced Plan*	Maximum Number of Shares That May Yet Be Purchased Under the Plan*
January 2017	662,681	21.14	662,681	6,083,139
February 2017	410,224	20.43	410,224	5,672,915
March 2017	400,498	21.47	400,498	5,272,417
1st Quarter 2017 Total	1,473,403	21.03	1,473,403	
2017 Total	1,473,403		1,473,403	5,272,417

^{*}See above and below for additional plan details.

As of March 31, 2017, the Company has repurchased 76,227,583 shares at a total cost of \$750,207,494 under the plan. The following is a summary of quarterly share repurchase activity under the plan to date (adjusted for 2 for 1 stock splits each effected in the form of a 100% stock dividend issued effective May 6, 2005 and December 31, 2014, respectively):

Quarter Ended	Total Number of Shares Purchased All as Part of a Publicly Announced Plan (Post - Split)	Cost of Shares Purchased
March 31, 2003	1,660,000	\$ 10,246,810

EXHIBIT 31.1

CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER OF GENTEX CORPORATION

- I, Fred T. Bauer, certify that:
- 1. I have reviewed this guarterly report on Form 10-Q of Gentex Corporation;
- 2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures [as defined in Exchange Act Rules 13a-15(e)] and 15d-15(e)] and internal control over financial reporting [as defined in Exchange Act Rules 13a-15(f)] and 15d-15(f)] for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) designed such internal controls over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this quarterly report based on such evaluation; and
 - d) disclosed in this quarterly report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
