RELEASE: January 27, 2005

GENTEX REPORTS FOURTH QUARTER RESULTS

ZEELAND, Michigan, January 27, 2005 -- Gentex Corporation, the Zeeland, Michigan-based manufacturer of automatic-dimming rearview mirrors and commercial fire protection products, today reported financial results for the fourth quarter and year ended December 31, 2004.

The Company reported a two percent increase in revenues to a record of \$126.2 million for the quarter ended December 31, 2004. Fourth quarter net income declined by two percent to \$28.6 million compared with \$29.1 million in the fourth quarter last year. Earnings per diluted share were 37 cents in both fourth quarter periods.

For the calendar year 2004, the Company reported an eight percent increase in revenues to a record \$505.7 million. Net income increased by six percent to \$112.7 million for calendar year 2004 compared with calendar year 2003. Earnings per diluted share were \$1.44 for calendar 2004 compared with \$1.37 for calendar year 2003.

"Despite another challenging quarter, there is evidence of improvement on the margin side, as we have largely resolved the start-up production issues associated with new manufacturing processes that we began in the third quarter of 2004," said Gentex Executive Vice President Garth Deur.

Light vehicle production declines in North America contributed to the continued weakness during the fourth quarter. While the Company reported a seven percent overall increase in auto-dimming mirror unit shipments, that growth came from a 17 percent unit shipment increase to offshore customers. Mirror unit shipments to customers in North America declined by two percent, as light vehicle production in that region declined by three percent.

Deur said that he believes that auto-dimming mirror unit shipments will be flat to five percent higher in the first quarter of 2005 compared with the first quarter of 2004, and that mirror unit shipments will increase approximately ten percent for calendar year 2005 compared with calendar year 2004. These estimates are based on light vehicle production forecasts in the regions to which the Company ships product, as well as the expected option rates for its mirrors on prospective vehicle models.

The Company has begun utilizing the light vehicle production forecasting services of CSM Worldwide, and CSM's current forecasts for light vehicle production for calendar 2005 are approximately 15.9 million units for North America, 20.5 million for Europe and 13.1 million for Japan and Korea. For the first quarter of 2005, CSM is forecasting light vehicle production of 4.0 million units in North America, 5.2 million units in Europe and 3.5 million units in Japan and Korea. There is no significant difference in the overall production numbers when comparing CSM's estimates to those of the Company's previous vendor for the service.

Automotive revenues increased by two percent to \$121.0 million in the fourth quarter and by eight percent to \$483.2 million for calendar year 2004 compared with the same periods last year. Fire Protection revenues declined nine percent to \$5.2 million for the fourth quarter and by one percent to \$22.5 million for calendar year 2004 compared with the same prior year periods.

Auto-dimming mirror unit shipments to customers in North America declined by two percent in the fourth quarter and increased by three percent in calendar year 2004 compared with the same 2003 periods. North American light vehicle production declined by three percent in the fourth quarter and declined by one percent for calendar year 2004 compared with the same periods in 2003.

Unit shipments to offshore customers increased by 17 percent in the fourth quarter and 26 percent for calendar year 2004, compared with the same periods last year. The higher growth in offshore unit shipments is primarily attributable to increased vehicle penetration in the European and Asia-Pacific regions. Light vehicle production in Western Europe declined five percent in the fourth quarter and by one percent for calendar year 2004 compared with the same periods in 2003.

Total auto-dimming mirror unit shipments in the fourth quarter were approximately 2.9 million, a seven percent increase over the same period last year. For calendar year 2004, total unit shipments reached a record 11.6 million, a 13 percent increase over calendar year 2003.

Certain matters discussed in this news release, including the ability to take advantage of manufacturing improvements and unit shipment growth rates, are forward-looking statements which involve certain risks and uncertainties, and are subject to change based on various market, industry and other important factors. The Company cautions investors that numerous factors (some of which are outlined in the Company's Form 10-K filed with the Securities and Exchange Commission and other interim reports) and future events may affect the Company's actual results, and may cause those results to differ materially from those expressed in this news release. Furthermore, Gentex undertakes no obligation to update, amend, or clarify forward-looking statements whether as a result of new information, future events, or otherwise.

A conference call related to this news release will be simulcast live on the Internet beginning at 9:30 a.m. Eastern Standard Time today. To access that call, go to www.gentex.com and select the "Audio Webcast" icon in the lower right-hand corner of the page. Other conference calls hosted by the Company will also be available at that site in the future.

Founded in 1974, Gentex Corporation (Nasdaq: GNTX) is an international company that provides high-quality products to the worldwide automotive industry and North American fire protection market. Based in Zeeland, Michigan, the Company develops, manufactures and markets interior and exterior automatic-dimming automotive rearview mirrors that utilize proprietary electrochromic technology to dim in proportion to the amount of headlight glare from trailing vehicle headlamps. Many of the mirrors are sold with advanced electronic features, and more than 95 percent of the Company's revenues are derived from the sales of auto-dimming mirrors to nearly every major automaker in the world.
